Solar Powered Security Solutions for Cameras, Lighting, Access, Monitoring and Alarms

Solar power and batteries offer a versatile rugged power solution for cameras and other security electronics needed in outdoor environments.

- Eliminate the time and expense of utility companies to bring power connections to your site
- Rugged Solar + Battery Systems are sized to effectively operate outdoor cameras, motion-activated lighting, warning lights, or security access systems as required by your specifications
- Skid mounted systems are forklift-transportable which is more secure and cost effective than trailer-mounted systems
- Forklift-transportable systems deter theft and can be redeployed to another site once the project is completed
- Integrate communications and control components – including RTUs/PLCs and other devices, in a rugged Type 3R-4X enclosure, for a complete security system
- 5-Year Warranty on materials and workmanship

Solarcraft[™] THE POWER OF QUALITY

Applications

- Construction Sites and Restricted Areas
- Road Work Zones and Detours
- Crisis Management and Emergencies
- Public Events
- Equipment Yards
- Pipeline, Rail, and Infrastructure
- Parking Lots
- Emergency Muster Stations

Fleet Options

Do you have multiple sites or need to monitor large areas? Consult with Solarcraft to design and build a standard fleet of re-deployable solar powered security systems suited for your applications. Once designed, systems can be ordered in multiples for economic pricing and efficient manufacturing.

Private labeling and branding available.

Call us to discuss your application at 877.340.1224, or visit us at solarcraft.net.

◀ Solar power + battery system to power multiple cameras that monitor a construction site.

◀ Solar powered muster station at chemical plant.
